Voluntary Product Accessibility Template (VPAT)

The purpose of the Voluntary Product Accessibility Template, or VPATTM, is to assist Federal contracting officials and other buyers in making preliminary assessments regarding the availability of commercial "Electronic and Information Technology" products and services with features that support accessibility. We have provided additional contact information below to facilitate more detailed inquiries.

The first table of the Template provides a summary view of the Section 508 Standards. The subsequent tables provide more detailed views of each subsection. There are three columns in each table. Column one of the Summary Table describes the subsections of subparts B and C of the Standards. The second column describes the supporting features of the product or refers you to the corresponding detailed table, e.g., "equivalent facilitation." The third column contains any additional remarks and explanations regarding the product. In the subsequent tables, the first column contains the lettered paragraphs of the subsections. The second column describes the supporting features of the product with regard to that paragraph. The third column contains any additional remarks and explanations regarding the product.

Summary Table Criteria **Supporting Features Remarks and Explanations** Section 1194.21 Software Applications and Operating Systems Not applicable Section 1194.22 Web-based internet information and applications Supports Section 1194.23 Telecommunications Products Not applicable Section 1194.24 Video and Multi-media Products Not applicable Section 1194.25Self-Contained, Closed Products Not applicable Section 1194.26 Desktop and Portable Computers Not applicable Section 1194.31 Functional Performance Criteria Supports Section 1194.41 Information, documentation, and support Supports

Section 1194.21 Software Applications and Operating Systems Criteria **Supporting Features** Remarks and explanations (a) When software is designed to run on a system that has a keyboard, product functions shall be executable Not applicable from a keyboard where the function itself or the result of performing a function can be discerned textually. (b) Applications shall not disrupt or disable activated features of other products that are identified as accessibility features, where those features are developed and documented according to industry standards. Applications also shall not disrupt or disable activated features of any operating system that are Not applicable identified as accessibility features where the application programming interface for those accessibility features has been documented by the manufacturer of the operating system and is available to the product developer. (c) A well-defined on-screen indication of the current focus shall be provided that moves among interactive interface elements as the input focus changes. The focus Not applicable shall be programmatically exposed so that Assistive Technology can track focus and focus changes. (d) Sufficient information about a user interface element including the identity, operation and state of the element shall be available to Assistive Technology. When an image Not applicable represents a program element, the information conveyed by the image must also be available in text. (e) When bitmap images are used to identify controls, status indicators, or other programmatic elements, the Not applicable meaning assigned to those images shall be consistent throughout an application's performance.

Section 1194.21 Software Applications and Operating Systems Criteria **Supporting Features** Remarks and explanations (f) Textual information shall be provided through operating system functions for displaying text. The Not applicable minimum information that shall be made available is text content, text input caret location, and text attributes. (g) Applications shall not override user selected contrast and color selections and other individual display Not applicable attributes. (h) When animation is displayed, the information shall be displayable in at least one non-animated presentation Not applicable mode at the option of the user. (i) Color coding shall not be used as the only means of conveying information, indicating an action, prompting a Not applicable response, or distinguishing a visual element. (j) When a product permits a user to adjust color and contrast settings, a variety of color selections capable of Not applicable producing a range of contrast levels shall be provided. (k) Software shall not use flashing or blinking text, objects, or other elements having a flash or blink Not applicable frequency greater than 2 Hz and lower than 55 Hz. (I) When electronic forms are used, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required Not applicable for completion and submission of the form, including all directions and cues.

Section 1194.22 Web-based Internet information and applications

Criteria	Supporting Features	Remarks and explanations
(a) A text equivalent for every non-text element shall be provided (e.g., via "alt", "longdesc", or in element content).	Supports	Images provide alternative text or text equivalents within adjacent content.
(b) Equivalent alternatives for any multimedia presentation shall be synchronized with the presentation.	Supports	Videos are captioned and accessible versions of videos are provided using AblePlayer.
(c) Web pages shall be designed so that all information conveyed with color is also available without color, for example from context or markup.	Supports	Color is not used as the sole means of communicating information.
(d) Documents shall be organized so they are readable without requiring an associated style sheet.	Supports	Pages are fully understandable when styles are removed.
(e) Redundant text links shall be provided for each active region of a server-side image map.	Not applicable	There are no server side image maps used in this site.
(f) Client-side image maps shall be provided instead of server-side image maps except where the regions cannot be defined with an available geometric shape.	Not applicable	There are no server side image maps used in this site.
(g) Row and column headers shall be identified for data tables.	Supports	Row and column headers are identified for data tables.
(h) Markup shall be used to associate data cells and header cells for data tables that have two or more logical levels of row or column headers.	Not applicable	There are no complex data tables used in this site.

Section 1194.22 Web-based Internet information and applications Criteria Remarks and explanations **Supporting Features** (i) Frames shall be titled with text that Not applicable Frames are not used facilitates frame identification and navigation (j) Pages shall be designed to avoid causing the Pages do not contain flashing screen to flicker with a frequency greater than **Supports** elements. 2 Hz and lower than 55 Hz. The site will provide text only (k) A text-only page, with equivalent pages to provide equivalence for information or functionality, shall be provided non-compliant pages. to make a web site comply with the provisions While most pages present much of of this part, when compliance cannot be Supports the critical information in a text accomplished in any other way. The content of format, a text-only page is not a the text-only page shall be updated whenever practical alternative for an the primary page changes. interactive web site. Many pages and components on the site are dependent on (I) When pages utilize scripting languages to JavaScript to function properly. display content, or to create interface elements, the information provided by the Supports JavaScript functions on the site script shall be identified with functional text fully support assistive technology. that can be read by Assistive Technology. Scripted controls fully support screen readers. (m) When a web page requires that an applet, plug-in or other application be present on the Necessary Flash and PDF support client system to interpret page content, the are provided by browsers or Not applicable page must provide a link to a plug-in or applet automatically installed. that complies with 1194.21(a) through (l).

Section 1194.22 Web-based Internet information and applications

Criteria	Supporting Features	Remarks and explanations
(n) When electronic forms are designed to be completed on-line, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.	Supports	Electronic forms are properly labeled.
(o) A method shall be provided that permits users to skip repetitive navigation links.	Supports	Heading tags permit the user to skip navigation elements.
(p) When a timed response is required, the user shall be alerted and given sufficient time to indicate more time is required.	Not applicable	Timed responses are not used.

Section 1194.23 Telecommunications Products Criteria **Supporting Features** Remarks and explanations (a) Telecommunications products or systems which provide a function allowing voice communication and which do not themselves provide a TTY functionality shall Not applicable provide a standard non-acoustic connection point for TTYs. Microphones shall be capable of being turned on and off to allow the user to intermix speech with TTY use. (b) Telecommunications products which include voice communication functionality shall support all commonly Not applicable used cross-manufacturer non-proprietary standard TTY signal protocols. (c) Voice mail, auto-attendant, and interactive voice response telecommunications systems shall be usable by Not applicable TTY users with their TTYs. (d) Voice mail, messaging, auto-attendant, and interactive voice response telecommunications systems that require a response from a user within a time Not applicable interval, shall give an alert when the time interval is about to run out, and shall provide sufficient time for the user to indicate more time is required. (e) Where provided, caller identification and similar telecommunications functions shall also be available for Not applicable users of TTYs, and for users who cannot see displays. (f) For transmitted voice signals, telecommunications products shall provide a gain adjustable up to a minimum Not applicable of 20 dB. For incremental volume control, at least one intermediate step of 12 dB of gain shall be provided. (g) If the telecommunications product allows a user to adjust the receive volume, a function shall be provided to Not applicable automatically reset the volume to the default level after every use.

(22.2N) maximum.

Section 1194.23 Telecommunications Products Criteria **Supporting Features** Remarks and explanations (h) Where a telecommunications product delivers output by an audio transducer which is normally held up to the Not applicable ear, a means for effective magnetic wireless coupling to hearing technologies shall be provided. (i) Interference to hearing technologies (including hearing aids, cochlear implants, and assistive listening devices) shall be reduced to the lowest possible level that allows a Not applicable user of hearing technologies to utilize the telecommunications product. (j) Products that transmit or conduct information or communication, shall pass through cross-manufacturer, non-proprietary, industry-standard codes, translation protocols, formats or other information necessary to provide the information or communication in a usable Not applicable format. Technologies which use encoding, signal compression, format transformation, or similar techniques shall not remove information needed for access or shall restore it upon delivery. (k)(1) Products which have mechanically operated controls or keys shall comply with the following: Controls Not applicable and Keys shall be tactilely discernible without activating the controls or keys. (k)(2) Products which have mechanically operated controls or keys shall comply with the following: Controls and Keys shall be operable with one hand and shall not Not applicable require tight grasping, pinching, twisting of the wrist. The force required to activate controls and keys shall be 5 lbs.

Criteria Supporting Features Remarks and explanations (k)(3) Products which have mechanically operated controls or keys shall comply with the following: If key repeat is supported, the delay before repeat shall be adjustable to at least 2 seconds. Key repeat rate shall be adjustable to 2 seconds per character.

Not applicable

or sound.

(k)(4) Products which have mechanically operated controls or keys shall comply with the following: The status of all locking or toggle controls or keys shall be

visually discernible, and discernible either through touch

Section 1194.24 Video and Multi-media Products

Criteria	Supporting Features	Remarks and explanations
a) All analog television displays 13 inches and larger, and computer equipment that includes analog television receiver or display circuitry, shall be equipped with caption decoder circuitry which appropriately receives, decodes, and displays closed captions from broadcast, cable, videotape, and DVD signals. As soon as practicable, but not later than July 1, 2002, widescreen digital television (DTV) displays measuring at least 7.8 inches vertically, DTV sets with conventional displays measuring at least 13 inches vertically, and stand-alone DTV tuners, whether or not they are marketed with display screens, and computer equipment that includes DTV receiver or display circuitry, shall be equipped with caption decoder circuitry which appropriately receives, decodes, and displays closed captions from broadcast, cable, videotape, and DVD signals.	Not applicable	
(b) Television tuners, including tuner cards for use in computers, shall be equipped with secondary audio program playback circuitry.	Not applicable	
(c) All training and informational video and multimedia productions which support the agency's mission, regardless of format, that contain speech or other audio information necessary for the comprehension of the content, shall be open or closed captioned.	Not applicable	
(d) All training and informational video and multimedia productions which support the agency's mission, regardless of format, that contain visual information necessary for the comprehension of the content, shall be audio described.	Not applicable	
(e) Display or presentation of alternate text presentation or audio descriptions shall be user-selectable unless permanent.	Not applicable	

Section 1194.25 Self-Contained, Closed Products Criteria **Supporting Features** Remarks and explanations (a) Self contained products shall be usable by people with disabilities without requiring an end-user to attach Not applicable Assistive Technology to the product. Personal headsets for private listening are not Assistive Technology. (b) When a timed response is required, the user shall be alerted and given sufficient time to indicate more time is Not applicable required. (c) Where a product utilizes touchscreens or contactsensitive controls, an input method shall be provided that Not applicable complies with §1194.23 (k) (1) through (4). (d) When biometric forms of user identification or control are used, an alternative form of identification or activation, which does not require the user to possess Not applicable particular biological characteristics, shall also be provided. (e) When products provide auditory output, the audio signal shall be provided at a standard signal level through an industry standard connector that will allow for private Not applicable listening. The product must provide the ability to interrupt, pause, and restart the audio at anytime. (f) When products deliver voice output in a public area, incremental volume control shall be provided with output amplification up to a level of at least 65 dB. Where the ambient noise level of the environment is above 45 dB, a Not applicable volume gain of at least 20 dB above the ambient level shall be user selectable. A function shall be provided to automatically reset the volume to the default level after every use.

Section 1194.25 Self-Contained, Closed Products Criteria **Supporting Features** Remarks and explanations (g) Color coding shall not be used as the only means of conveying information, indicating an action, prompting a Not applicable response, or distinguishing a visual element. (h) When a product permits a user to adjust color and contrast settings, a range of color selections capable of Not applicable producing a variety of contrast levels shall be provided. (i) Products shall be designed to avoid causing the screen to flicker with a frequency greater than 2 Hz and lower Not applicable than 55 Hz. (j) (1) Products which are freestanding, non-portable, and intended to be used in one location and which have operable controls shall comply with the following: The position of any operable control shall be determined with respect to a vertical plane, which is 48 inches in length, Not applicable centered on the operable control, and at the maximum

(j)(2) Products which are freestanding, non-portable, and
intended to be used in one location and which have
operable controls shall comply with the following: Where
any operable control is 10 inches or less behind the
reference plane, the height shall be 54 inches maximum
and 15 inches minimum above the floor.

protrusion of the product within the 48 inch length on products which are freestanding, non-portable, and intended to be used in one location and which have

operable controls.

Not applicable

Section 1194.25 Self-Contained, Closed Products Criteria **Remarks and explanations Supporting Features** (j)(3) Products which are freestanding, non-portable, and intended to be used in one location and which have operable controls shall comply with the following: Where any operable control is more than 10 inches and not Not applicable more than 24 inches behind the reference plane, the height shall be 46 inches maximum and 15 inches minimum above the floor. (i)(4) Products which are freestanding, non-portable, and intended to be used in one location and which have operable controls shall comply with the following: Not applicable Operable controls shall not be more than 24 inches behind the reference plane.

Section 1194.26 Desktop and Portable Computers Criteria Remarks and explanations **Supporting Features** (a) All mechanically operated controls and keys shall Not applicable comply with §1194.23 (k) (1) through (4). (b) If a product utilizes touchscreens or touch-operated controls, an input method shall be provided that complies Not applicable with §1194.23 (k) (1) through (4). (c) When biometric forms of user identification or control are used, an alternative form of identification or activation, which does not require the user to possess Not applicable particular biological characteristics, shall also be provided. (d) Where provided, at least one of each type of expansion slots, ports and connectors shall comply with Not applicable publicly available industry standards

Section 1194.31 Functional Performance Criteria

Criteria	Supporting Features	Remarks and explanations
(a) At least one mode of operation and information retrieval that does not require user vision shall be provided, or support for Assistive Technology used by people who are blind or visually impaired shall be provided.	Supports	Basic site navigation as well as site functions and activities can be performed using a screen reader.
(b) At least one mode of operation and information retrieval that does not require visual acuity greater than 20/70 shall be provided in audio and enlarged print output working together or independently, or support for Assistive Technology used by people who are visually impaired shall be provided.	Supports	Basic site navigation as well as some of the site's functions and activities can be performed using a screen reader or a screen magnifier. The site does allow the user to provide custom high contrast palettes and support browser zoom.
(c) At least one mode of operation and information retrieval that does not require user hearing shall be provided, or support for Assistive Technology used by people who are deaf or hard of hearing shall be provided	Supports	Videos are captioned
(d) Where audio information is important for the use of a product, at least one mode of operation and information retrieval shall be provided in an enhanced auditory fashion, or support for assistive hearing devices shall be provided.	Not applicable	PC hardware should be capable of providing enhanced audio or support for enhanced hearing devices.
(e) At least one mode of operation and information retrieval that does not require user speech shall be provided, or support for Assistive Technology used by people with disabilities shall be provided.	Not applicable	Speech is not required to operate this web site.

reach and strength shall be provided.

mouse – we have provided a link to an accessible option.

Section 1194.41 Information, documentation, and support

Criteria	Supporting Features	Remarks and explanations
(a) Product support documentation provided to endusers shall be made available in alternate formats upon request, at no additional charge.	Supports	Product documentation is available.
(b) End-users shall have access to a description of the accessibility and compatibility features of products in alternate formats or alternate methods upon request, at no additional charge.	Supports	Documentation of accessibility features in alternate formats is available.
(c) Support services for products shall accommodate the communication needs of end-users with disabilities.	Supports	Email and phone support are available.
