29 programs

Programs Launched

= 10 programs

Participants

6,502 participants

= 1,000 participants

Credentials Earned

3,870 credentials

= 1,000 credentials

See explanatory information at www.doleta.gov/taaccct/state-profiles.cfm.

The U.S. Department of Labor's TAACCCT grant program is a major investment in building the capacity of community colleges. Grant funds are not used for tuition, but to create or enhance programs of study that lead to industry-recognized credentials, upgrade equipment, support student success toward completion, and more. TAACCCT supports colleges to better serve workers eligible for training under the TAA for Workers program, as well as a broad range of other adults.

Examples from Tennessee

Industry Emphasis of Programs of Study

Manufacturing

Healthcare

Energy

To find free and open career and technical training resources produced by colleges using TAACCCT funds, visit <https://www.skillscommons.org/>.

Tennessee Example: The "A Prescription for Training Healthcare Workers in Tennessee (RX TN)" consortium shared [36 learning resources](#) including syllabi, student handouts, and curricula on nursing, computer programming, and database management, in addition to student support modules covering time management, study skills, effective reading, and other related topics.

Bridgestone Tire Company contributed over \$4 million to Motlow State Community College (MSCC) toward renovation of classrooms and computer stations, and for equipment and maintenance at the state-of-the-art mechatronics training facility on-site at the Bridgestone production facility in Smyrna, TN. MSCC, in turn, offers the complete mechatronics program at the facility, providing the faculty time and academic experience. The program provides a path into manufacturing jobs with Bridgestone, Nissan, and other plants in the area.

"As a machining apprentice, Michael participated in a highly successful partnership that our college has fostered with a significant industrial partner...Michael maintained a 4.0 GPA and earned recognition and patents for his inventions crafted during his tenure [here]. His singular ambition led him to learn not only traditional machining and manufacturing skills, but also emerging technologies, such as additive machining."

Brandon Walters, Program Director, Pellissippi State Community College, Southeastern Economic and Education Leadership Consortium
